

RENEWABLE ENERGY EXPERIENCE

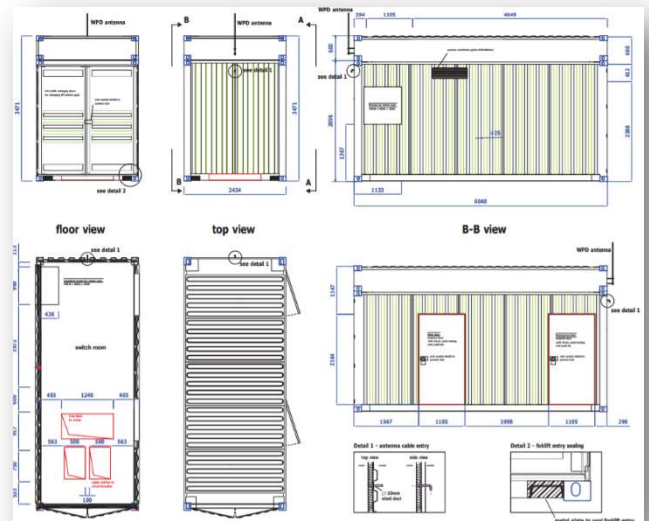

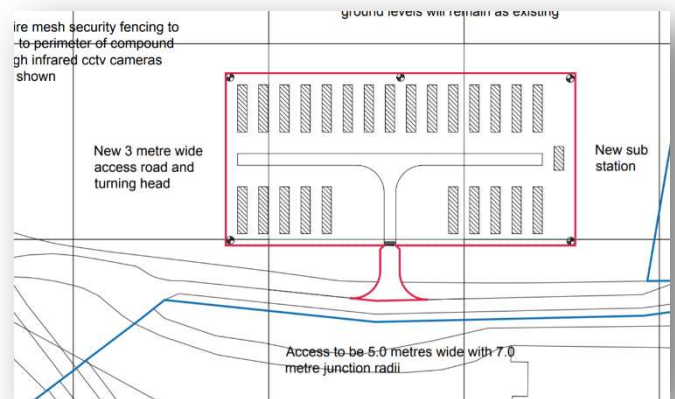

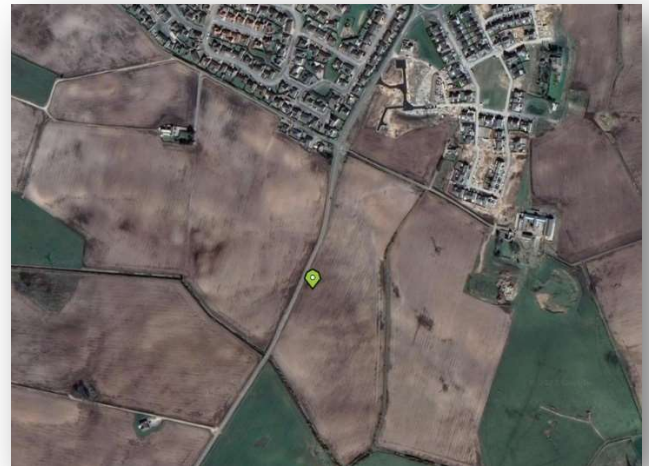

01

INTRODUCTION

Since 2008, RCA Regeneration Ltd have built up significant experience in dealing with proposals for various types of renewable energy infrastructure and have had an excellent level of success. Amongst our typical instructions, we provide planning support for applications including Short Term Operating Reserves, large scale Solar and large scale Battery Storage schemes from Scotland to Cornwall and everywhere in between.

We have delivered schemes of up to 50MW in areas which have had sensitivities including landscape, drainage, noise and ecology constraints, but are now working on far larger projects. RCA have also worked on projects which integrate district heating through CHP/Biomass energy generation for housing schemes ranging from 100 units to large urban extensions in excess of 2,000 units. We have also worked on commercial developments with integrated biomass heating and solar arrays. Working with our chosen consultancy teams, we have project-managed, negotiated and worked successfully with local planning authorities, helping to improve their understanding of these schemes which have resulted in planning permissions for our clients.

We keep up to date with the government's drive to expand network capacity and improve energy generation through the use of renewable energy and we are keen to ensure this is communicated to the Local Authorities in an easy to understand way, to ensure a timely planning permission is delivered. We are also aware of the numerous appeal decisions that influence decision making by local authorities and we often use these to support our proposals. We also provide support in making representations to emerging development plans, to ensure sites are considered by local authorities for renewable energy allocation in the longer term.

Please call us to discuss your project, we would be happy to provide you with a fee proposal for our support, together with putting a team together to deliver the scheme through planning on your behalf.

If you have questions, or you think that RCA could be of assistance to you, please call us on: 01905 887686. Alternatively, email: info@rcaregeneration.co.uk
